

CNX Technology and
Innovation Group
Your Obsolescence Management Partners

CNX Technology and Innovation Group (CNXTIG) Obsolescence Management Services

We offer bespoke, cost-effective solutions tailored to your needs, helping you manage and mitigate component obsolescence — so you can focus on building for today while we help safeguard your products for tomorrow.

Our Bespoke Obsolescence Services:

1. Obsolescence Mitigation Component Engineering

Determining suitable alternative components for those that threaten your products' continued production.

2. Component database Scrubbing:

Ensure your basic component data; Manufacturer, Manufacturers Part Number is correct and up to date. Acquisitions and Mergers can change manufacturer name and part number, and it is important to have the correct information to present to your suppliers.

3. Component monitoring for Year to End-of-Life and Legislative Compliance.

Individual monitoring for critical components within your design(s).
Component information updated and reported 2 times per year or if events occur that may threaten your supply chain.

4. Bill of Material monitoring for Year to End-of Life and Legislative Compliance.

Monitoring of all components in a Bill of Material with updates 2 times per year or if events occur that may threaten your supply chain.
A personalised service that ensures that your products remain viable now, and in the future.

5. Full Component database monitoring for Year to -End-of Life and Legislative Compliance.

Ensure your entire component database is up to date for components projected end-of-life and legislative compliance, with updates 2 times per year or if events occur that may threaten your supply chain. A personalised service that ensures that your products remain viable - today and in the future.

6. Auditing of Sub-Contractors and Suppliers for Obsolescence Management Planning

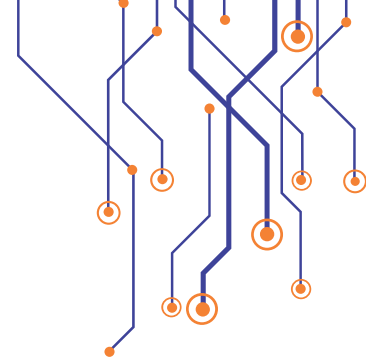

Do you ensure your sub-contractors and suppliers conduct their own Obsolescence Management Plan to protect their, and therefore your own products?
We will conduct annual audits to ensure that they meet the standards you require of them.

7. Obsolescence Management Plan Consulting

Ensure your Obsolescence Management Plan is optimised for your own business or Organisation.

8. Procurement of Obsolete components assistance

We can help identify trusted sources to satisfy many of your obsolete component requirements.

CNXTIG Obsolescence Management services are powered by:

Z2Data and CMCAuk

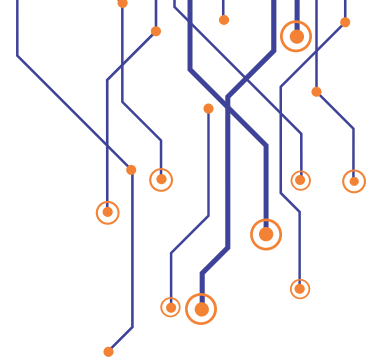

We believe that **Z2Data** provide a superior service to the others available for individual Electronic Component and Mechanical Item Information and rely on they to provide up-to-date and reliable information to help our clients.

Our partnership with **CMCAuk** allows us to determine life cycle and legislative compliance of electronic and non-electronic components; materials, mechanical parts, lubricants, etc. This is a highly personalised service where your suppliers are contacted directly to collect the information required.

Obsolescence Management Training:

Obsolescence Management and Counterfeit Avoidance

1. 1-day, remote course: Introduction to Obsolescence Management - the basics.

This course will introduce you to the basics of obsolescence; Terminology, Standards, Component Life-Cycle, Supplier Product Change Notices, etc... **Available Soon**

2. 2-day, remote course: Obsolescence Management - in depth knowledge.

Builds on the knowledge gained in the first 1-Day course.

Investigate the mitigations that can be planned to resolve obsolescence issues. **Available Soon**

3. 1-day, remote course: Counterfeit Avoidance and Detection – the basics.

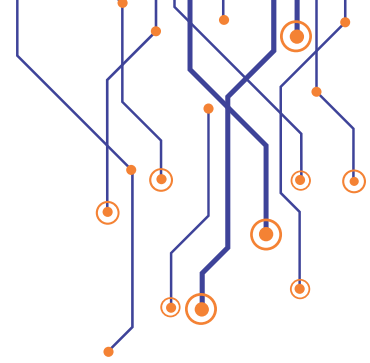

The prevalence of counterfeit components, how they enter the supply chain, and what can be done to minimise the possibility of their being introduced into your products. **Available Soon**

4. Company courses available as above but on requested schedule.

For 5 or more participants on a schedule of your choosing. **Available Soon**

Disclaimer for Obsolescence Management Services

The obsolescence management services provided by **CNX Technology and Innovation Group (CNXTIG)** are designed to support clients in identifying, mitigating, and planning for risks related to the unavailability or discontinuation of components, materials, or technologies.

While **CNXTIG** makes every effort to provide accurate, current, and reliable data, forecasts, and recommendations based on available industry information and supplier trends, we do not guarantee the completeness, accuracy, or future availability of any specific part, supplier, or technology.

By utilizing our services, you acknowledge and agree that:

- All decisions based on our insights, assessments, or recommendations are made at your own discretion and risk.
- **CNXTIG** shall not be held liable for any direct, indirect, incidental, or consequential losses arising from reliance on our services, including but not limited to production delays, procurement issues, or financial impact.
- Our services are not a substitute for your organization's internal risk management processes, supplier engagement, or engineering judgment.

CNXTIG reserves the right to modify its tools, methodologies, and information sources without prior notice to reflect evolving industry standards and technologies.

For applications requiring regulatory compliance or mission-critical reliability, we recommend engaging additional qualified professionals and performing independent validation.
